INDEX

S.NO.	Objective	Page No.	Signature
1	WAP to calculate the sum of two numbers		
2	WAP to calculate the sum and percentage of a student in 5 subjects		
3	WAP to calculate area and perimeter of a rectangle		
4	WAP to calculate area and perimeter of a circle		
5	WAP to calculate Gross Salary of an employee where DA is 40% of Basic Salary and HRA is 20% of the Basic Salary		
6	WAP to read principal amount, time and rate of from user and calculate Simple Interest		
7	WAP to print first 10 square numbers		
8	Write a program to generate the table of any number n upto 10		
9	Write a program to check whether the number is odd or even		
10	Write a program to print reverse of a given number n.		
11	WAP to perform Numeric Array/lndexed Array		
12	WAP to perform Associative Array using print_r function in PHP		
13	WAP to perform Multidimensional Array		
14	WAP to perform various array functions like: sort, rsort, asort, arsort, ksort, krsort		
15	WAP to perform various array inbuilt functions like: array_chunk, count, reverse, array_slice, array _ merge, array_combine, array range function, shuffle, (current,next,end,previous,reset), implode, explode, extract ,split		
16	WAP to find the factorial of any number using recursive function		
17	WAP to implement call by value and call by reference		
18	WAP to implement strstr() and stristr function		
19	WAP to implement $ and $$ variables		
20	WAP to implement gettype() datatype to display various data type of variables		
21	WAP to implement get, post and request method		
22	WAP to perform query string parameter in form		
23	WAP to perform various HTML controls like: submit& reset button, check box and radio buttons, list box, text box and combo box		
24	WAP to implement how session work in PHP		
25	WAP to implement how cookies work in PHP		
26	WAP to implement how hidden field work in PHP		
27	WAP to create form calculator in php		
28	WAP to create a registration form in php and display values in same page		
29	WAP to create a Food Corner form in php and display values in same page		
30	WAP to create a purchase order form in php and display values in same page		
31	WAP using class constructor and destructor in PHP		
32	WAP using Inheritence in php. Show the use of all access modifiers in PHP		
33	WAP in php for file uploading and downloading		

34	WAP in php for file opening, file closing, file reading and file writing		
35	WAP in php for create and drop a database		
36	WAP in php for create and delete a table		
37	WAP in php for the insert, delete, select and update query
